5ᵀᴴ Grade Math

Discover · Explore · Practice · Create

1 — I CAN write and interpret simple expressions with numbers.

2 — I CAN analyze patterns and identify relationships between corresponding terms.

3 — I CAN understand the place value system, and I CAN apply it to multiplication and division of decimals.

4 — I CAN read, write, compare, estimate and round decimals to any place.

5 — CAN multiply 1-digit and 2-digit numbers using the standard algorithm.

6 — I CAN read, write, compare, estimate and round decimals to any place.

7 — I CAN add, subtract, multiply and divide decimals to the hundredths.

8 — I CAN add and subtract fractions with unlike denominators.

9 — I CAN interpret a fraction as division, and convert quotients of division problems into a fraction

10 — I CAN multiply a fraction, mixed number or a whole number by a fraction.

11 — I CAN divide a fraction by a whole number and divide a whole number by a fraction.

12 — I CAN convert like measurement units within a given measurement system and solve multi-step measurement problems.

13 — I CAN represent and interpret data.

14 — I CAN find, estimate, apply and compare the volume of rectangular prisms using unit cubes and the formula for volume.

15 — I CAN represent and interpret data.

16 — I CAN classify two-dimensional figures into categories based on their properties.
